Arogyavardhini Vati: A theoretical analysis

Santosh Pal, A Ramamurthy, Bidhan Mahajan*

Abstract

Ayurveda is the oldest methodical branch of knowledge which speaks its reality in the sketch of philosophy. It comprises most scientific milieu of derivation. As per ancient Ayurveda scholars for getting a desirable outcome of any medication, it should be precisely analyzed before prescribing to the patient. There are numbers of classical formulations successfully practiced by Ayurveda physicians for treating various ailments but in maximum cases there is lack of data regarding their details mechanism of action. Such one multidrug classical formulation is Arogyavardhini vati which is widely practiced Ayurveda formulation. Present study aimed to compile all the available literature regarding the pharmacological actions and properties of the drug. Several studies have proved this drug is safe and effective in hyperlepiademia, ear discharge along with its hepatoprotective and anti oxidant activity. It promotes digestive fire, clears body channels for the nutrients to reach to the tissues, balances fats in the body and removes toxins by improving the digestive system. The review may provide the information with clues of further systematic investigation.

Keywords: Ayurveda formulations, Hepatoprotective, Skin disorder.

INTRODUCTION

The word ‘Arogya’ means good health and ‘Vardhini’ means improver. It means a formulation, which improves good health, is known as ‘Arogyavardhini’. This is used in the imbalances of all the three Dosha (humour). As per ancient Ayurveda scholars behind each successful physician there is panorama of appropriate knowledge of the drugs. Ayurveda recommends the use of plant based as well as mineral based medicines for treating various disease conditions [1]. These classical medicines should be precisely analyzed before application to the patient for getting a desirable outcome. There are numbers of multidrug formulations practiced in Ayurveda clinics successfully but most of them are anguish from lack of data regarding their details mechanism of action. Such one widely practiced formulation is Arogyavardhini vati [2-3].

The meaning of the term Arogyavardhini indicates which can destroy all the diseases and promotes health. This traditional formulation of Ayurveda is using for centuries with claimed efficacy and safety in treatment of jaundice and other liver and skin disorders [7]. It is used for leprosy, fever, oedema, obesity, jaundice and other hepatic disorders. The drug is also good for lack of appetite, indigestion and irregular bowls, liver disorders and skin diseases. It acts as an alternative, carminative, stomachic [8]. Present review aimed to critically analyze the details mechanism of action of the drug. Literary resources have been used in this study. All the related information available in text and internet have been collected and analyzed for making the decisive discussion.

Ingredients and preparation of Arogyavardhini Vati [2, 6, 8, 9]:

Fine powder of above ingredient is grounded with the juice of Nimba leaves for two days. Then it made into paste and pills are prepared as equal size of Rajakola (variety of Indian jujube fruit). As per Acharya Hariprasanna Sharma prepared size will be like Kshudrakola. It is black colour and bitter in taste. Normal dose has mentioned by the scholar is 500mg- 1gm per day.

Indication: According to Rasaratnasamuccaya, Bhaisajyaratnavali and Bharathasajyaratnakar the drug Arogyavardhini vati possess the pharmacological action like-Kusthanasaka (can alleviate all types of skin disorder) – indicated for 1 manifold (14 days). Tridosha jvara nashaka (fever arising due to involvement of three humours) - indicated for 5 days. Also the drug has the properties like- pachan (digestive), dipani (appetizer), pathya (wholesome for channel), hridya (cardio protective), medonasaka (can alleviate the diseases arising from hyperlipidemia), malashuddhikari (cleaning of waste materials from body), increase kshudha (appetizer), Sarbaroga prashamani (can alleviate all types of disorders from body).

Anupana (Adjuvant): The medicine Arogyavardhani vati can be prescribed with various types of adjuvant as per condition of disease pathology and the patients. Like as: Moong dal- Vigna radiate (L.) R. Wilczek; Masur dal- Lens culinaris Medik.; Arhar- Cajanus cajan (L.) Millsp.; Ghee (ghee made from cow milk); Barley-Hordeum vulgare L.; Parwal-Trichosanthes dioica Roxb.; Curd (curd from cow milk); Milk (cow milk); Urad dal - Vigna mungo (L.) Hepper; Sugarcane juice; Jaggery; Butter Milk. Dashamula kwatha and Punarnavadi kwatha.

Side Effects: So far no reports are available concerning the adverse effect of this formulation. However there should be some precaution as the formulation contains various minerals and heavy metal like Mercury as ingredient. If such ingredients are not purified properly, sometimes it may prove to be dangerous for self medication. Over-dosage may cause severe poisonous effect. It should be strictly avoided in pregnant, lactating women and children.

Analysis of Action: As per principles of Ayurveda the balance of three vital energies namely Vata, Pitta and Kapha in the body are stands for maintaining the health of the body. The imbalance of these three elements is the main reason for any illness in the body like fatty liver and jaundice etc. The drug contains ingredients like Haritaki (Terminalia chebula) which is an astringent and laxative in nature. It is effective for relieving liver disorders and useful in relieving fatty liver and cirrhosis of liver. The herb Bibhitaki (Terminalia bellirica) is a laxative and a valuable remedy for digestive disorders and effective anthelmintic. It has styptic property and hence useful in arresting bleeding. Another ingredient Amaluki-(Emblica officinalis) is an antibacterial, carminative, hypoglycaemic, stomachic, hypotensive and astringent agent. It has antioxidant, anti hepatotoxic and immune modulator properties. The mineral Shuddh shilajit is an effective agent for renewing vitality. It acts like nectar; it has powerful antioxidant properties and thereby delays the process of aging. It is useful in relieving kidney diseases, liver diseases, digestive disorders and mental illness. The oleo-gum-resin Guggulu (Commiphora mukul), helps in getting rid of cholesterol by converting it into bile. It is an effective remedy for removing the unwanted fats and balancing the cholesterol levels. The herb Chitra (Plumbago zeylanica) is an effective agent in relieving digestive disorders like loss of appetite, indigestion, piles, worms, colitis and various liver diseases. Another important ingredient (Picrohriza kurroa) is an effective therapeutic agent in liver disorders. It is effective in liver damage caused by chemicals such as carbon tetrachloride, paracetamol and even alcohol.

Pharmacological action of Arogyavardhani Vati: The drug is extremely beneficial in Cirrhosis of liver, jaundice and in case of poor liver functioning. It is used as an excellent measure for various types of acute problems. It provides total health and makes the body free from all types of diseases and brings a balance between the three Dosha. It is beneficial for leprosy, oedema, obesity, jaundice and various types of hepatic disorders. A double-blind trial for treatment of acute viral hepatitis was conducted with Arogyavardhini by Antarkar et al. (1980) which had showed significant hepatoprotective effects by Arogyavardhini vati. The drug is also useful for individuals suffering from indigestion and irregular bowel movements. It brings about the promotion of the digestive power of the body, acts as a tonic for liver,
heart, kidneys, uterus, rectum and intestine. It is also beneficial for chronic fevers and water retention. Arogyavardhini vati reduces inflammation of spleen, liver, bladder, kidneys, uterus and intestine. The prolonged use of Arogyavardhini vati benefits in disordered functioning of endocrine glands (low or high hormonal production) that leads to imbalanced growth of body and organs. It is a good remedy for removal of excessive fat, clearing of various types of toxins from the body and helps in reduction of accumulated cholesterol in the body. The drug showed effectiveness in various types of hepatitis whether it is A, B or C. It helps in maintenance of healthy digestive system along with circulatory, respiratory, excretory, reproductive and skeletal system. It is also beneficial in diarrhoea and even in dysentery. It works great for various types of body aches. It is beneficial for heart as it brings about the strengthening of heart or cardiac muscles. The drug also cures various types of inflammatory conditions of intestines. It promotes digestive fire, clears body channels for the nutrients to reach to the tissues, balances fats in the body and removes toxins by improving the digestive system.

CONCLUSION

Arogyavardhini vati improves overall good health by balancing all the three Dosha. The drug does not have appreciable toxicological effects on brain, liver and kidney. This remedy is also known as natural liver detoxifying and fatty liver remedy. It promotes balance and maintains the liver function as well as a healthy digestive system. Arogyavardhini vati does the Shoshan (assimilation) of different excess Snigdha dravyas (~unctuous substances) present in the body. It also does the Pachan (~digestion) of Drava (~liquid) and Kleda (~clammy) and does the Raktsavaranaha (~purifies blood). It reduces Dravatva, Snigdhata in Meda dhatu. The drug must be consumed with various adjuvants for getting the desired effect. Self medication of the drug should be strictly avoided to overcome any untoward effect.
